

National Palliative Care Week
21–27 May

Matters of  and death

“You are
the **expert**
in **your life.**”

**Live as well as
possible, for as
long as possible.**

Access to palliative care
from the time of diagnosis
can ensure the quality
of life you deserve –
whether that’s at home,
in hospital, in a hospice
or in residential aged care.

**What does quality of life
look like to you? Start
the conversation today.**
