VIRTUAL SPECIALIST CONSULTS

Specialist care. When and where you need it!

ADVANCE CARE PLANNING

Advance Care Planning (ACP) is helping your patients plan for future healthcare in case they are ever too ill to speak for themselves.

The ACP team provides person-centred support and advice for patients and loved ones to discuss and document future medical instructions, preferences, and personal values. The ACP clinic also allows for direct patient consults.

Have you had these conversations with your patient?

Do you know what they would want?

The Advance Care Planning team can help your patient with:

- Information about Advance Care Planning and how to navigate the process
- Advice for the Medical Treatment Decision Maker
- Goals of care discussions
- Discussions when there is conflict in decision-making

ABOUT VSC:

Virtual Specialist Consults (VSC) is a Victoria-wide public health initiative offering **free virtual consultations** with hospital-based specialists.

Designed to support primary care providers, VSC facilitates case discussions and co-consults in a virtual environment.

VSC makes it easy for you to access specialist care for your patients.
